1. Introduction

- This project is an internship management system. It provides various types of internships.
- Problem Identified :
 - Nowadays internships are offered by many firms. Many of which require expensive fee to get admitted into.
- Solution Proposed :
 - Our projects goal is to give opportunity to opt for internships free of cost.

2. Objectives

1. To provide an user friendly interface.
2. To provide free internships.
3. To achieve efficiency.

3. Scope

1. Can be useful for users trying to expand their knowledge about a particular field.
2. Can be used by students from all educational fields/branches.

4. Feature /Functionality

1. Feature 1 :

- Has a functioning MySQL connection for registering and/or logging in.

2. Feature 2 :

- User can immediately start with any course of choice right away.

3. Feature 3 :

- Provides interactive video tutorials for user.

5. Outcome of Project

1. User can log in/register.
2. User can select through various internships/courses available to them.

6. Technology Stack

1. Language – JAVA
2. Packages – Swing, AWT
3. Database – MySQL

Thank You...!!
